

E-book/e-reader Installation & Download Instructions: Kotobee and Apple Books (iBooks)

LOMA currently supports two e-readers: Apple Books (formerly known as iBooks) and Kotobee Reader. Other readers may have limited support for the interactive features included in our e-books.

How do I know which to choose?

It's a matter of personal preference, although Apple Books is only available on an Apple device.

Kotobee Reader

Installation

1. Go to: <https://www.kotobee.com/products/reader>
2. Click the appropriate link based on your device and operating system
 - a. You will be redirected to the App Store on iOS devices
 - b. You will be redirected to the Google Play store on Android devices
3. Follow instructions during the installation process.
4. If installing on a mobile device, Kotobee will ask for permission to access photos, media, and files on your device. Select "Allow."

Downloading e-book Files

1. On the course portals, from Getting Started, My Dashboard, or the top navigation bar, choose the module you want to download to Kotobee Reader.
2. Click on the "Module e-book" link for that module.
3. If using an Apple device or computer, you might be given a choice between Open in Books or More. To use Kotobee Reader, you should choose "More" and then "Save to Files."
4. Save the file to your location of choice.
5. Open Kotobee Reader and select Open EPUB file.

NOTE: Please **do not** double-click or right-click on the EPUB file to open it. This will likely open the file in a browser instead of Kotobee. Viewing the e-Book in a browser will disable interactive content.
6. Navigate to the saved file to open.

Apple Books (formerly iBooks)

Installation

NOTE: If you're using an Apple device, Apple Books may be installed already. If you've removed Apple Books from your device, follow the instructions.

1. Launch the App Store from your Apple computer or mobile device.
2. Search for "Apple Books."
3. Download the app.
4. If installing on a mobile device, iOS will ask for permission to access photos, media, and files on your device. Select "Allow."

Downloading e-book Files

1. On the course portal, from Getting Started, My Dashboard, or the top navigation bar, choose the module you want to download to Apple Books.
2. Click on the “Module e-book” link for that module.
3. Depending on your browser, you’ll be given the option to Open in Books or Save to Files.
 - a. Open in Books will open the e-book in Apple Books immediately and save the file in your library.
 - b. If you choose to Save to Files, you’ll get the option to save the e-book in your location of choice in your Files folder.
4. Apple Books will save the file in your library once you’ve opened it.
